Qualifications

Cory Hunt has worked in both policy and technology to understand human-environment interaction and the processes at work therein. His education includes extensive policy, theory and writing training as well as broad experience and training with a number of technological products. While at the University of Nevada, Reno, he was hired to perform research regarding the social, political and historical contexts of the Walker River Project. Working on the project, he developed a deep understanding for the underpinnings of water rights and land acquisition in the arid West and provided critical research for development of the final analysis of the project. Mr. Hunt also served twice at the Nevada Legislative Counsel Bureau in both the Research and Administrative Divisions, where he worked with complex computer and database programming, as well as a variety of other technical tasks. With his broad understanding and experience, Mr. Hunt is currently working on helping to develop the conceptual and technical framework for the Lake Tahoe TMDL Water Quality Accounting and Tracking System, as well as the Indicator Framework and Reporting Platform for the Lake Tahoe Management and Evaluation System. Mr. Hunt's overall goal is to find innovative ways to use technology and policy to aid in understanding, restoring and improving our ecosystems.

Relevant Experience

Water Rights Acquisition, Ecosystem Restoration and Multi-stakeholder Processes

- Provided support in the research and composition of historical, political and socio-economic analysis as part of the Walker Basin Project
- Created legislative histories, performed bill tracking, data analysis, Geographic Information Systems, personal interviews and site studies
- Worked on historical and contemporary analysis of the Truckee River Operating Agreement implementation

Mapping and Information Technology

- Developed surveys and GIS analyses of neighborhood conditions in Washoe County
- Design team member for the award-winning www.leg.state.nv.us web site at the Nevada Legislature, receiving commendations from the Legislative Director for work performed
- Helped create automated bill-tracking site for Nevada Legislature

Software/Programming Experience

Adobe - Acrobat Pro, ColdFusion, Dreamweaver, Fireworks, Flash, Illustrator, Photoshop, Premier

ESRI - ArcView, ArcGIS
